Listing 1: Example from https://ziglang.org/

```
1  const std = @import("std");
2  const parseInt = std.fmt.parseInt;
3
4  test "parse_integers" {
5      const input = "123_67_89,99";
6      const ally = std.testing.allocator;
7
8      var list  = std.ArrayList(u32).init(ally);
9      // Ensure the list  is  freed  at  scope  exit.
10     // Try commenting out this line!
11     defer list.deinit();
12
13     var it = std.mem.tokenize(u8, input, " ,");
14     while (it.next()) |num| {
15         const n = try parseInt(u32, num, 10);
16         try list.append(n);
17     }
18
19     const expected = [_]u32{ 123, 67, 89, 99 };
20
21     for (expected, list.items)  |exp, actual| {
22         try std.testing.expectEqual(exp, actual);
23     }
24 }
```
